Dear reader!

As scientific knowledge increases and the boundaries of science move forward, setting increasingly ambitious and complex goals involving hundreds or thousands of scientists from different countries is becoming more and more essential for the achievement of the scientific goals.

However, no project would be feasible without the support of an international public opinion fully aware of the importance of its purpose both from a scientific point of view and from that of the technological, economic and social implications.

Close collaboration between scientists and science communicators is therefore more relevant than ever to ensure that information on those issues is accurate, thorough and as broad as possible.

Hence, we would like to bring to your attention the scientific journal EUROPEAN SCIENCE containing the findings on topical scientific directions.

This issue presents a broad-based spectrum of thought provoking articles that are reflective of the ever-expanding Universe. As you read through these articles, be sure to capture the innovative concepts becoming a reality and look for opportunities to apply them to your own efforts at the realization.

We hope, you enjoy this journal, and encourage you to reach out to us for opportunities to publish your own thought-provoking articles in future issues.
